

Project Planning & Control Using Primavera P6 Client Fundamental – Blended Training

ORACLE PRIMAVERA P6 is the recognized standard for high performance project management software designed to handle large scale, highly sophisticated and multifaceted projects.

This course is aimed at industry professionals on how to use Primavera P6 professional client or optional client version to a fundamental level. This course provides hands-on training for Primavera P6 software. Participants will gain understanding in concepts of project planning, scheduling and controlling. All workshops and instruction cover the 3 basic element of Project Management: Schedule, Resource and Costs.

IPEC advocates blended learning approach in order to increase efficiency of the training. This course entitles training participants to get 6 months IPEC Cloud Hosted e-Learning subscription. e-Learning enable training participants to learn 24x7 anytime during the subscription period once the classroom or LVC training is completed. e-Learning can be accessed using any web browser and no additional software installation is required.
