INTRODUCING THE AACE CERTIFIED COST PROFESSIONAL (CCP) CREDENTIAL

Boost your cost engineering career with the globally recognized CCP certification from AACE International. Showcase your expertise in cost engineering, estimating, planning, and scheduling

What is Certified Cost Professional (CCP) Certification?

The CCP certification recognizes experienced practitioners applying advanced Total Cost Management (TCM) principles in organizational projects. CCPs excel in research and effective communication to stakeholders. Globally recognized since 1976, it demands rigorous criteria in examination, experience, education, and ethics. Accredited by CESB and ICEC, AACE International's Certified Cost Professional certification distinguishes professionals with a significant impact on the bottom line.

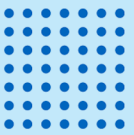

Why Choose the CCP Certification?

Global Recognition: Gain worldwide respect with the CCP certification, showcasing your commitment to excellence in cost engineering. Employers, clients, and industry professionals highly regard this credential.

Expertise Validation: As a CCP, you validate your proficiency in cost engineering, estimating, planning, and scheduling. It sets you apart as a competent professional in the field.

Career Advancement: Open doors to exciting career opportunities with the CCP certification, distinguishing yourself in a competitive job market. Enhance your professional credibility and increase your earning potential.

INTRODUCING THE AACE CERTIFIED COST PROFESSIONAL (CCP) CREDENTIAL

CCP is based on AACE Total Cost Management (TCM) Framework

AACE International (Association for the Advancement of Cost Engineering) presents the Total Cost Management (TCM) framework—a comprehensive approach designed to effectively manage costs from project initiation to completion. TCM offers a structured framework that integrates various cost management disciplines and processes, empowering you to optimize project outcomes.

Total Cost Management (TCM) is the key to effectively managing costs, resources, profitability, and risk throughout the entire life cycle of any enterprise, program, facility, project, product, or service. It is a systematic approach that applies professional and technical expertise to ensure cost efficiency at every stage.

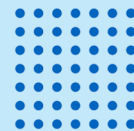

Why Choose Total Cost Management?

Comprehensive Approach: TCM offers a holistic and integrated methodology to manage costs across all aspects of your endeavor. It considers the complete life cycle, from inception to completion, ensuring cost control and optimization at every step.

Resource Optimization: TCM helps you allocate and utilize resources effectively, maximizing their value and minimizing waste. By understanding resource requirements, you can optimize their allocation to enhance productivity and reduce costs.

Profitability Enhancement: With TCM, you gain insights into the cost implications of your business decisions. By systematically managing costs, you can improve profitability and drive sustainable growth for your enterprise.

Risk Mitigation: TCM emphasizes proactive risk management to identify and mitigate potential threats to your project's financial health. By identifying risks early on, you can develop robust strategies to minimize their impact on costs and ensure project success.

Our Online E Learning:

Our ECPM e-Learning portal is developed keeping in mind busy ECPM professionals and interactive learning methods. Our e learning portal enables participants to learn at their own pace after or before the classroom training.

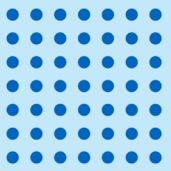

We use Flip Teaching approach in our online e-learning portal. Following this method in our CCE/CCC Prep Course students watch lectures online and work on problem sets and discuss core knowledge areas with trainer in Virtual Workshops. This approach allows complete coverage of the 'Skills and Knowledge of Cost Engineering' book without losing focus on key knowledge areas from which the problems are expected in the certification examination. This method allows both flexibility and interaction. Students can listen to our pre-recorded lectures and tutorials at their convenience 24x7. Virtual Workshops facilitate interaction between students and trainer.

Following is the list of virtual workshops:

- Virtual Workshop 1: Introduction to CCE/CCC Certification**
- Virtual Workshop 2: How to Write CCE/CCC Technical Paper**
- Virtual Workshop 3: Solving Earned Value Management Problems**
- Virtual Workshop 4: Solving Breakeven Analysis Problems**
- Virtual Workshop 5: Solving Depreciation Problems**
- Virtual Workshop 6: Solving Time Value of Money Problems**
- Virtual Workshop 7: Solving Economic Analysis Problems**
- Virtual Workshop 8: Solving Statistics Problems**
- Virtual Workshop 9: Critical Path Method Problems**

These workshops are conducted through Virtual Classrooms. Our virtual classroom enables us to deliver a high-quality learning experience to remote students. In addition to the virtual workshop, students can ask queries and doubts through Discussion Boards.
